On January 12, 2018, the Company redeemed 2,000,000 shares of Series B Preferred Stock at a price of \$25.00 per share for an aggregate of \$50.0 million, plus all accrued and unpaid dividends up to (but excluding) the redemption date.

## 2018 Guidance

The Company's initial 2018 guidance is as follows:

Net income attributable to common shareholders per diluted share	\$0.04 to \$0.06
NAREIT-defined FFO per diluted share	\$0.48 to \$0.50
Operating FFO per diluted share	\$0.53 to \$0.55

The guidance is based, in part, on the following assumptions:

- Same-property NOI excluding redevelopment properties will be relatively flat from 2017 to 2018.
- Bon-Ton bankruptcy impact of approximately \$0.01 per share
- Incremental third-party fees related to shareholder activism and ongoing litigation in connection with the termination of the former Chief Operating Officer aggregating approximately \$0.01 per share
- No acquisitions or dispositions included in guidance; guidance range will be updated quarterly for any closings

## **Non-GAAP Financial Measures**

FFO is a widely recognized supplemental non-GAAP measure utilized to evaluate the financial performance of a REIT. The Company considers FFO to be an appropriate measure of its financial performance because it captures features particular to real estate performance by recognizing that real estate generally appreciates over time or maintains residual value to a much greater extent than other depreciable assets. The Company also considers Operating FFO to be an additional meaningful financial measure of financial performance because it excludes items the Company does not believe are indicative of its core operating performance, such as acquisition pursuit costs, amounts relating to early extinguishment of debt and preferred stock redemption costs, management transition costs and certain redevelopment costs. The Company believes Operating FFO further assists in comparing the Company's performance across reporting periods on a consistent basis by excluding such items. FFO and Operating FFO should be reviewed with GAAP net income attributable to common shareholders, the most directly comparable GAAP financial measure, when trying to understand the Company's operating performance. A reconciliation of net income (loss) attributable to common shareholders to FFO and Operating FFO for the three months and full years ended December 31, 2017 and 2016 is detailed in the attached schedule.

EBITDA is a widely recognized supplemental non-GAAP financial measure. The Company computes EBITDA as net income from continuing operations, plus interest expense (including early extinguishment of debt costs), depreciation and amortization, minority interests' share of consolidated joint venture EBITDA, and discontinued operations. The Company believes EBITDA provides additional information with respect to the Company's performance and ability to meet its future debt service requirements. The Company also considers Adjusted EBITDA to be an additional meaningful financial measure of financial performance because it excludes items the Company does not believe are indicative of its core operating performance, such as acquisition pursuit costs, gain on sales, impairment provisions and management transition costs. The Company believes Adjusted EBITDA further assists in comparing the Company's performance across reporting periods on a consistent basis by excluding such items. EBITDA and Adjusted EBITDA should be reviewed with GAAP net income from continuing operations, the most directly comparable GAAP financial measure, when trying to understand the Company's operating performance.

Same-property NOI is a widely recognized supplemental non-GAAP financial measure for REITs. Properties are included in same-property NOI if they are owned and operated for the entirety of both periods being compared, except for properties undergoing significant redevelopment and expansion until such properties have stabilized, and properties classified as held for sale. Consistent with the capital treatment of such costs under GAAP, tenant improvements, leasing commissions and other direct leasing costs are excluded from same-property NOI. The Company considers same-property NOI useful to investors as it provides an indication of the recurring cash generated by the Company's properties by excluding certain non-cash revenues and expenses, as well as other infrequent items such as lease termination income which tends to fluctuate more than rents from year to year. Same property NOI should be reviewed with consolidated operating income, the most directly comparable GAAP financial measure.

## CEDAR REALTY TRUST, INC. Non-GAAP Financial Disclosures

## Funds From Operations ("FFO") and Operating Funds From Operations ("Operating FFO")

FFO is a widely recognized supplemental non-GAAP measure utilized to evaluate the financial performance of a REIT. The Company presents FFO in accordance with the definition adopted by the National Association of Real Estate Investments Trusts ("NAREIT"). NAREIT generally defines FFO as net income attributable to common shareholders (determined in accordance with GAAP), excluding gains (losses) from sales of real estate properties, impairment provisions on real estate properties, plus real estate related depreciation and amortization, and adjustments for partnerships and joint ventures to reflect FFO on the same basis. The Company considers FFO to be an appropriate measure of its financial performance because it captures features particular to real estate performance by recognizing that real estate generally appreciates over time or maintains residual value to a much greater extent than other depreciable assets.

The Company also considers Operating FFO to be an additional meaningful financial measure of financial performance because it excludes items the Company does not believe are indicative of its core operating performance, such as acquisition pursuit costs, amounts relating to early extinguishment of debt and preferred stock redemption costs, management transition costs and certain redevelopment costs. The Company believes Operating FFO further assists in comparing the Company's performance across reporting periods on a consistent basis by excluding such items.

FFO and Operating FFO should be reviewed with GAAP net income attributable to common shareholders, the most directly comparable GAAP financial measure, when trying to understand the Company's operating performance. FFO and Operating FFO do not represent cash generated from operating activities and should not be considered as an alternative to net income attributable to common shareholders or to cash flow from operating activities. The Company's computations of FFO and Operating FFO may differ from the computations utilized by other REITs and, accordingly, may not be comparable to such REITs.

## Earnings Before Interest, Taxes, Depreciation and Amortization ("EBITDA") and Adjusted EBITDA

EBITDA is a widely recognized supplemental non-GAAP financial measure. The Company computes EBITDA as net income from continuing operations, plus interest expense (including early extinguishment of debt costs), depreciation and amortization, minority interests share of consolidated joint venture EBITDA and discontinued operations. The Company believes EBITDA provides additional information with respect to the Company's performance and ability to meet its future debt service requirements.

The Company also considers Adjusted EBITDA to be an additional meaningful financial measure of financial performance because it excludes items the Company does not believe are indicative of its core operating performance, such as acquisition pursuit costs, gain on sales, impairment provisions and management transition charges. The Company believes Adjusted EBITDA further assists in comparing the Company's performance across reporting periods on a consistent basis by excluding such items.

EBITDA and Adjusted EBITDA should be reviewed with GAAP net income from continuing operations, the most directly comparable GAAP financial measure, when trying to understand the Company's operating performance. EBITDA and Adjusted EBITDA do not represent cash generated from operating activities and should not be considered as an alternative to income from continuing operations or to cash flow from operating activities. The Company's computations of EBITDA and Adjusted EBITDA may differ from the computations utilized by other companies and, accordingly, may not be comparable to such companies.

## Same-Property Net Operating Income ("Same-Property NOI")

Same-property NOI is a widely recognized supplemental non-GAAP financial measure for REITs. Properties are included in same-property NOI if they are owned and operated for the entirety of both periods being compared, except for properties undergoing significant redevelopment and expansion until such properties have stabilized, and properties classified as held for sale. Consistent with the capital treatment of such costs under GAAP, tenant improvements, leasing commissions and other direct leasing costs are excluded from same-property NOI. The Company considers same-property NOI useful to investors as it provides an indication of the recurring cash generated by the Company's properties by excluding certain non-cash revenues and expenses, as well as other infrequent items such as lease termination income which tends to fluctuate more than rents from year to year.

Same-property NOI should be reviewed with consolidated operating income, the most directly comparable GAAP financial measure. Same-property NOI should not be considered as an alternative to consolidated operating income prepared in accordance with GAAP or as a measure of liquidity. The Company's computations of same-property NOI may differ from the computations utilized by other REITs and, accordingly, may not be comparable to such REITs.
